

CAPS & CLOSURES

YOUR IDEAL PACKAGING PARTNER

Establishing supply chain partners that help you achieve a faster time-to-market with dependable quality and competitive pricing is a key to success in today's packaging marketplace. Erie Molded Packaging is just such a partner. We offer an extensive line of caps and closures manufactured to the highest quality standards and delivered with the industry's shortest lead-times. We currently produce closures for a wide range of markets including food and beverage, personal care, health and beauty, chemical, pharmaceutical, nutraceutical and custom. Our continual investment in people, plant, and equipment enable us to deliver on our promise to provide our customers with *Big Company Capabilities* backed by *Small Company Service*.

EMP RAPID RESPONSE...

From Quick Turn Quotes to the Industry's Shortest Lead Times

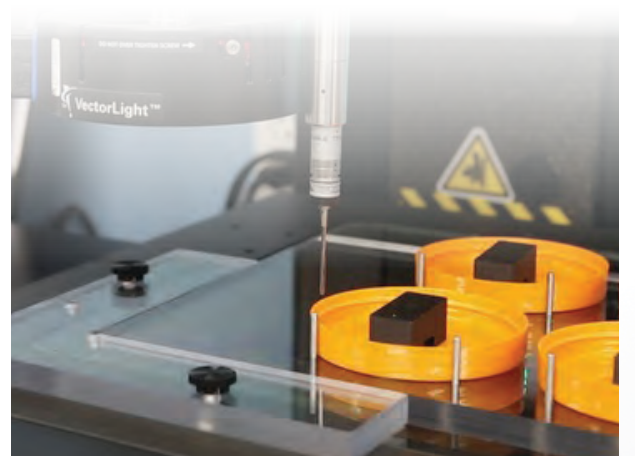

The EMP Rapid Response program is designed to help you get your product to market faster. Our customer service group will work with your product development team to find the ideal stock closure solution. Using our online Build Your Closure tool we'll get you a quote and estimated delivery schedule right away. And with our flexible manufacturing system and extensive tooling, we offer the most competitive lead-times in the industry.

Competitive Pricing & Quality You Can Count On

Integral to our Rapid Response program is an extremely competitive pricing structure designed to save you money. We offer flexible order quantities and stocking programs to help integrate our closures into your overall production schedule. In addition, our caps and closures are molded in an environmentally controlled facility with a quality control system that yields our ISO 9001:2015 certification.

HIGH-SPEED LINING CAPABILITIES

EMP uses state-of-the-art, high speed in-process lining equipment in order to provide the best overall value for cap lining. Our lining process minimizes handling and maximizes quality and value while keeping costs and lead times lower. We offer induction, foam and pressure sensitive lining options.

STANDARD OR CUSTOM COLORS

ERIE MOLDED PACKAGING

Providing Packaging Solutions Since 1982

For more than 40 years, Erie Molded Packaging has been providing OEM and distribution customers custom injection molded parts and integrated packaging solutions. All of our custom and standard products are manufactured in our state-of-the-art molding facility conveniently located in Erie, PA. This temperature and humidity controlled plant features molding presses ranging from 85 to 725 tons and an automated material delivery system ensures efficient raw material supply to the presses.

Family owned since 1982, Erie Molded Packaging provides a unique combination of technical and systematic expertise with responsive, personal service. We manufacture close-tolerance products for a wide range of markets including food and beverage, personal care, health and beauty, chemical, pharmaceutical, nutraceutical and custom.
